### Dimensions

UM11D - 82 x 82 x 30mm (L x W x H)

UM11D-50 - 82 x 82 x 5mm (L x W x H)

### Description

The UM11D series are used to signal hold up or panic alarms. By pressing the centrally located paper seal, the release of the spring-loaded button will rupture the paper seal, providing visual confirmation of the activation of the device. The UM11D series are protected against opening of the main body of the button, by an internal micro-switch, which provides a changeover contact. Each panic button is supplied with 5 paper seals.

### UM11D

The panic buttons consist of the following component parts;

- a) The inner plate, which houses the micro-switches and cable connection terminals.
- b) A middle plate, which secures the device to the back box.
- c) The outer housing complete access to the paper seal.
- d) Back box for surface mounting.
- e) Cable strain relief and cable grommets.

### UM11D-50

The panic buttons consist of the following component parts;

- a) The inner plate, which houses the micro-switches and cable connection terminals.
- b) A middle plate, which secures the device to the back box.
- c) The outer housing complete access to the paper seal.

Note: flush mounting wall box is not supplied as part of this deliverable.
