ABOUT STI CAGES

STI CAGES

STI stock a comprehensive range of cages designed to protect smoke detectors, smoke beam/CCTV, clock/fire bells, external/emergency lighting, motion detectors and beacon/sounders from vandalism and misuse. Constructed from plastic coated, heavy-duty galvanised steel rod, the cages can cope with the severest of abuse from vandalism or accidental damage. Installation fixings are provided, but where additional security is required, tamper resistant screws and matching bits are available.
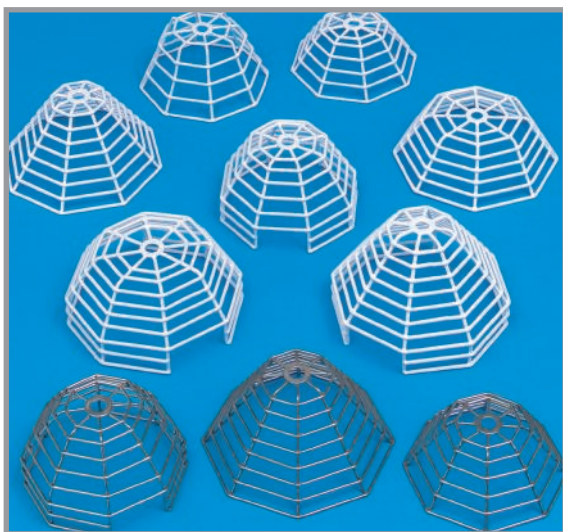

FEATURES

- Constructed from heavy-duty galvanised steel rod
- Plastic or powder* coated for durability and external use
- Protects against vandalism or accidental damage
- Designed so there is no interference with the operation of the protected unit
- Supplied with full fixing kit
- Optional tamper resistant fixings available
- Available from stock
- Custom cages built to order
- 3-year guarantee against breakage in normal use

*on selected models

STI STEEL WEB STOPPERS

Choosing the right STI Smoke Detector Protector for your application.

Use one of our Steel Web Stoppers (shown here) with a plastic coated, heavy-duty steel rod or stainless steel construction if...

- The risk of abuse to smoke detectors is severe
- Smoke detectors are located in vulnerable areas where vandalism or accidental damage is frequent
- Variety of sizes within the range can fit a wider choice of devices
- Stainless steel construction is required
- Plastic coated version is required for indoor or outdoor use

Use our Polycarbonate Detector Stopper (page 11) made from tough polycarbonate if...

- The risk of physical abuse to smoke detectors is severe
- It's advisable to lessen the chances of self harm in correctional facilities and mental hospitals (slots are too small for even a pencil to be passed through them)
- Translucent unit more aesthetically appealing
- Range of colours available to compliment your building interior

POLYCARBONATE DETECTOR STOPPER

STI 8100

STI 8100-A STI 8100-BK STI 8100-W
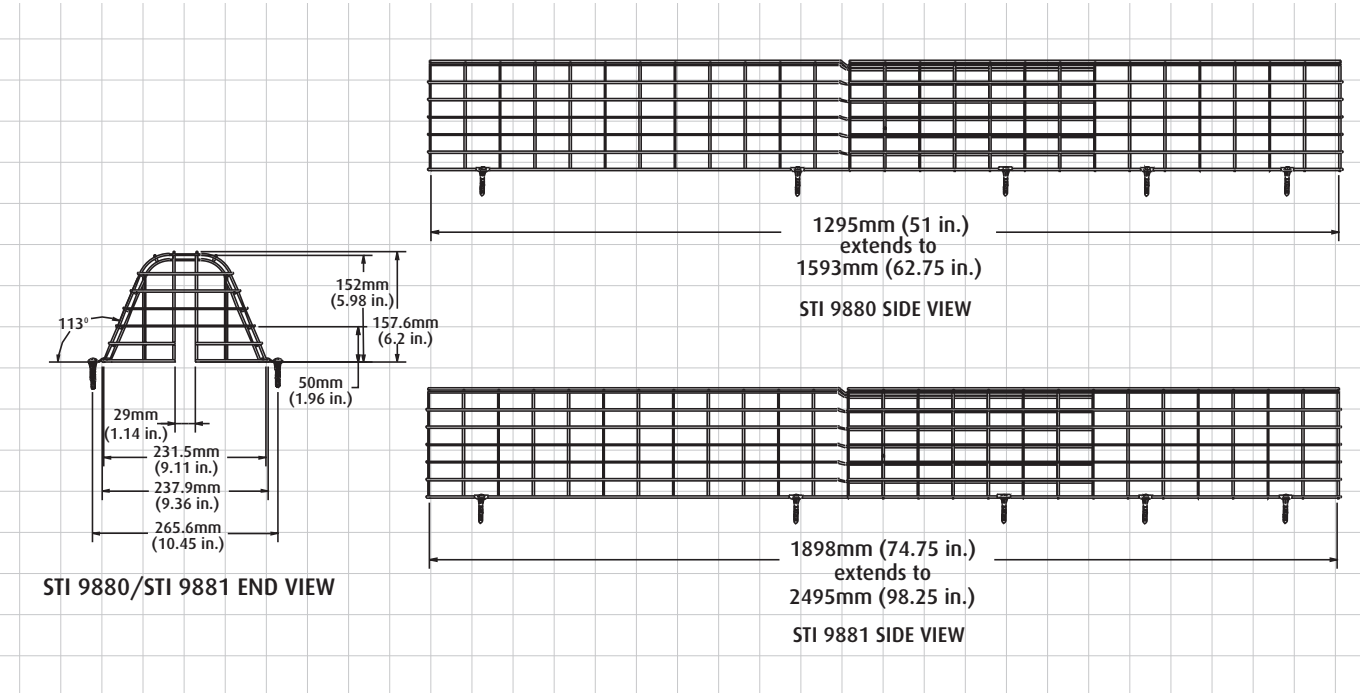

FEATURES

- Constructed from tough clear polycarbonate
- Protects smoke detectors from vandalism allowing the L.E.D to remain visible
- Recommended for correctional facilities with smoke detector vandalism
- Aesthetic alternative to the Steel Web Stopper
- Available for flush or surface mounted products
- Tamper resistant fixings available for additional security
- Available in a range of colours
- Polycarbonate tested -40^{0}F (-40^{0}c) to 120^{0}F (49^{0}C)

STI POLYCARBONATE DETECTOR STOPPER

There's no longer any reason to risk malfunction to your critically important smoke detectors from accidental or intentional damage. The Polycarbonate Detector Stopper is easy to install in areas where severe vandalism is causing false fire alarms or high maintenance costs to your smoke detectors.

As an aesthetic alternative to Steel Web Stoppers, this polycarbonate version can be used in correctional facilities and mental hospitals. The slots are too small for even a pencil to be passed through them.

Available for flush or surface mount applications with exposed conduit. The models are available in a range of colours to blend in with your building interior.

Supplied with a full installation fixing kit, tamper resistant fixings are available in the event additional security is required.

STI 8200-W

STI 8230-SS

c(UL)us certain smoke detectors only

STI STEEL SMOKE DETECTOR STOPPER

Designed to provide maximum protection for vulnerable detectors while not compromising their effective operation. Available in two finishes, the design adopts a sophisticated matrix of perforations that provides access for smoke to the detector while providing a protective shield against vandalism or misuse.

The Stainless Steel Detector Stopper has been manufactured from heavy duty 18 (1.2mm) stainless steel, which provides a natural resistance to corrosion. Ideal for any application where food is present as well as use in water treatment plants and correctional facilities.

The Coated Cold Rolled Steel Detector Stopper has been manufactured from 16 gauge (1.5mm) cold rolled steel with a white corrosion resistant polyester coating. The steel gives it strength and durability, protecting detectors which may be frequently vandalised causing high maintenance costs and false fire alarms.

All models come with a full installation fixing kit.

FEATURES

- Aesthetic appearance with the choice of stainless steel or coated cold rolled steel finish
- Protects against vandalism or misuse
- Easy installation and removal for servicing detectors
- Available for flush or surface mounted products
- Perforations allow the detectors to be fully operational
- STI 8200-SS & STI 8230-SS, manufactured from heavy duty 18 gauge (1.2mm) stainless steel – ideal for applications where food is present
- STI 8200-W & STI 8230-W, manufactured from 16 gauge (1.5mm) cold rolled steel with a white corrosion resistant polyester coating

OTHER STI PRODUCTS

STOPPER®

PROTECTIVE COVER TO HELP STOP MALICIOUS OR ACCIDENTAL FALSE FIRE ALARMS

This unique device has been helping stop false fire alarms around the world for decades, without restricting legitimate operation of devices such as fire alarm break glass call points. Ideal for schools, colleges, hospitals, nursing homes, hotels and all public buildings where there is a history or a threat of false fire alarms.

HOW IT WORKS

The Stopper consists of a clear, tamper-proof, tough polycarbonate cover and frame that retrofits over the break glass call point. When lifted to gain access to the break glass, its optional battery powered integral sounder emits a piercing 96dB (at 1 metre). Immediate attention is drawn to the area and a prankster will either run or be caught.

EXIT STOPPER®

STOP UNAUTHORISED EXITS AND ENTRIES THROUGH EMERGENCY EXIT DOORS

The Exit Stopper is a unique and highly effective way to alert you to any unauthorised exits or entries through any emergency exit door. It can also serve as an inexpensive security device and help prevent theft.

HOW IT WORKS

If the protected door is opened, the electronic Exit Stopper emits an ear piercing alarm. When the door is closed, a number of reset options are available including an automatic function. A variety of alarm duration and setup features are available. A key operated override facility will silence the alarm and allow authorised exits. The Exit Stopper is fitted with a 9V PP3 alkaline battery. It is available in red or green and can be mounted or installed on almost any type of door, including remote placement of the sounder.

EXTINGUISHER STOPPER®

STOP THEFT, VANDALISM OR MISUSE OF FIRE EXTINGUISHERS

If you are fed up with replacing or recharging your fire extinguisher, this sturdy, tamper-proof, self-contained device is the answer. It has proven highly effective in helping stop theft, misuse or vandalism of fire extinguishers. The Extinguisher Stopper will leave the extinguisher totally accessible for emergencies and will not interfere in the event of a real fire.

HOW IT WORKS

Its highly visible 'stop sign' design discourages wrongful use. If the protected fire extinguisher is moved from its normal position, an integral sounder emits a piercing alarm. The device is easy to install and a deactivation cable is supplied for ease of servicing the extinguisher. The Extinguisher Stopper is supplied complete with an operating cable kit and a 9V PP3 alkaline battery.

You can find all of these products in the STI Product Catalogue.

Unit 49G, Pipers Road,
Park Farm Industrial Estate,
Redditch, Worcestershire,
B98 0HU, England.

PRICES
All prices are quoted in pounds sterling and will be subject to V.A.T in the UK. Export prices are quoted ex works; freight and insurance will be quoted separately.

DELIVERY TERMS UK Mainland
Carriage is charged on orders subject to our terms and conditions.

● Standard Delivery
   All orders will be sent by carrier and delivered next day between 09:00 & 17:30 subject to availability and weight of package. All cages including custom cage orders, extinguisher cabinets and enclosures will be quoted at cost. This is due to the size of the cartons, which may on some occasions require a dedicated vehicle.

● Guaranteed or Special Delivery
   Please request a quotation at the time of placing purchase order.

● Cages, Cabinets & Enclosure Deliveries
   All cages including custom cage orders, extinguisher cabinets and enclosures will be quoted at cost. This is due to the size of the cartons, which may on some occasions require a dedicated vehicle.

Non UK Mainland
Please request a quotation at the time of placing purchase order.

DELIVERY TERMS Export
Our prices are quoted in pounds sterling based on ex works; however various carriage options will be quoted at the time of order confirmation.
